Dividing Responsibilities

Date	
Team ID	6aba07eeb2817f097462be97
Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Minimum Marks	

Dividing Responsibilities:

The FitBuddy project responsibilities are divided among team members according to their skills and areas of interest. This helps the team work on different parts of the application simultaneously while maintaining proper coordination. Responsibilities include application development, Gemini AI integration, interface design, database management, testing, documentation, and project coordination. Regular communication between members helps track progress, solve issues, and complete the project efficiently.

The application is designed to present the generated information in a clear and organized manner, making it easier for users to follow their fitness routine. The development also focuses on smooth interaction, quick AI responses, and a simple experience for users with different fitness needs. Furthermore, a simple and responsive interface makes FitBuddy easy to use across different devices, ensuring seamless accessibility whether the user is browsing on a desktop or logging sets on a mobile phone at the gym.

Dividing Responsibilities Chart:

To ensure smooth development and timely completion of the FitBuddy application, the project was divided into specific tasks and assigned to team members based on their skills and expertise. Each member took ownership of their respective responsibilities, which helped in better coordination, efficient workflow and focused progress throughout the project.

Regular meetings and updates were conducted to track the work, resolve issues and make necessary adjustments when needed.
