

Requirement Analysis

Identifying the Features

Date	
Team ID	6aba07eeb2817f097462be97
Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Minimum Marks	

Identifying the Features:

1. User Registration & Profile

Users can create a profile by providing basic details such as age, fitness level, goals, preferences, and available workout time.

2. Fitness Goal Selection

Users can select their fitness goals such as improving fitness, building strength, increasing stamina, or maintaining a healthy lifestyle.

3. AI-Powered Fitness Plan Generation

FitBuddy uses Gemini models to analyze user inputs and generate a personalized fitness plan.

4. Personalized Workout Recommendations

The system recommends suitable exercises based on the user's fitness level, goals, preferences, and available time.

5. Weekly Workout Schedule

FitBuddy creates an organized weekly workout schedule that users can easily follow.

6. AI Fitness Assistant

Users can interact with the AI assistant to ask general fitness-related questions and receive personalized guidance.

7. Progress Tracking

Users can record completed workouts and monitor their fitness progress over time.

8. Plan Modification

Users can update their goals or preferences, and FitBuddy can generate an updated fitness plan accordingly.

9. Exercise Information

The system provides exercise descriptions, basic instructions, and safety reminders to help users understand their workouts.

10. User-Friendly Interface

FitBuddy provides a simple and easy-to-use interface so users can generate and follow their fitness plans without difficulty.

Features Example:
